---

technical skills

Languages

Programming JavaScript, C++, Python.

My github: https://github.com/siggines
My website: jacobsiggins.co.uk

Some links to pages I've made which demonstrate JS web-app functionality:
Ambience web-app
Weather API
Drag & drop

I am familiar with Node.js, and a bit of React.
In C++ I have for example made games with the SFML framework.
Some other projects I have made in these languages are avaliable to view on my Github.

Markup HTML, CSS, TEX.

Here is an example demonstration of CSS functionality:
Simple text-effect

Scripting Python, Shell.

---

education

GCSE

Geography: C	Philosophy: B	History: B
Chemistry: C	Maths: B	Biology: B
Literature: C	Language: C	Physics: C

A-Level

Computer Science:	B
Government and politics:	D
Maths:	C

about me

Since finishing college I have been doing landscaping, and in some of my free time have been developing my programming knowledge, including learning a little bit of C++ and Java, and creating websites and web-applications with JS.

My ambition is to have a career in software development, and at the moment I am open to both the front-end and back-end pathways within the field.

I am currently searching for an apprenticeship because this is a good way to start a career in the field, and I'm eager for the oppurtunity to learn.
